We often hear the question: How big is the amplitude? In our case, it is the "sound amplitude". Usually, we are asking as if there is just "one" amplitude of sound waves in air. The loudness perception of a sound is determined by the amplitude of the sound waves – the higher the amplitude, the louder the sound or the noise.

Can you hear sounds in space? Now you've probably heard that there's no sound in space, but technically that's not true. Now yes, space is a virtual vacuum. However, sound does exist in the form of electromagnetic vibrations that pulsate in similar wavelengths. What NASA did was design special instruments that could record these electromagnetic vibrations, and transferred them into sounds that ...

Synchronization is the coordination of events to operate a system in unison. The conductor of an orchestra keeps the orchestra synchronized or in time. Systems that operate with all parts in synchrony are said to be synchronous or in sync—and those that are not are asynchronous.. Today, time synchronization can occur between systems around the world through satellite navigation signals.
