Facts About the Planet Mars - Fun & Interesting ...

John Gray (born December 28, 1951) is an American relationship counselor, lecturer and author. In 1969, he began a nine-year association with Maharishi Mahesh Yogi before beginning his career as an author and personal relationship counselor. In 1992 he published the book *Men Are from Mars, Women Are from Venus*, which became a long term best seller and formed the central theme of all his ...

John Gray (American author) - Wikipedia

Like Ravel's musical masterpiece Bolero, the romantic cadence may have soared to an exhilarating crescendo. Only in your love song, the orchestra hit some sour notes and the relationship's rhythm was shattered beyond repair. Astrologer Paul Westran has a tested theory about relationships that unfold in this way. In a rigorous, eight year study involving [...]

Unique Study Links Venus to Romantic Choices People Make

Does the space junk orbiting Earth have any effect on the amount of solar energy reaching the surface of our planet, either by absorbing or reflecting it?

Last Word Archive | New Scientist

Mars is the fourth planet from the Sun. It is also the second nearest planet to the Earth and will probably be the first planet visited by humans.

Mars, the red planet - Astronomy Today

Mars is the focus of much scientific study about possible human colonization. Mars's surface conditions and past presence of liquid water make it arguably the most hospitable planet in the Solar System besides Earth. Other than Venus, Mars requires less energy per unit mass to reach from Earth than any planet.. Permanent human habitation on other planets, including Mars, is one of science ...

Colonization of Mars - Wikipedia

While we tend to think that Earth's oceans make it a watery planet, it's actually only a tiny fraction of a percent of water by mass. Looking out into the universe, it's clear water is more ...

A radioactive metal may stifle the formation of water ...

The Moons of Mars, 1610 - 1877. The first to guess that Mars had moons was Johannes Kepler in 1610. When trying to solve Galileo's anagram referring to Saturn's rings, Kepler thought that Galileo had found moons of Mars instead.. In 1643, the Capuchin monk, Anton Maria Shyrl, claimed to have seen the moons of Mars.

Hypothetical Planets - Solar System

The chances of anything coming from Mars. Mars close up. The first close-up images from Mars came in 1965 with the Mariner 4 spacecraft flying by the planet, and then with Mariner 9 entering orbit ...

Planetary Science - Astronomy Notes

Cassini revealed in great detail the true wonders of Saturn, a giant world ruled by raging storms and delicate harmonies of gravity. Cassini carried a passenger to the Saturn system, the European Huygens probe —the first human-made object to land on a world in the distant outer solar system.. After 20 years in space — 13 of those years exploring Saturn — Cassini exhausted its fuel supply.

Overview | Cassini - NASA Solar System Exploration

Nicolaus Copernicus was an astronomer who proposed a heliocentric system, that the planets orbit around the Sun; that Earth is a planet which, besides orbiting the Sun annually, also turns once daily on its own axis; and that very slow changes in the direction of this axis account for the precession of the equinoxes.

Nicolaus Copernicus | Facts, Accomplishments, & Theory ...

Earth is the third planet from the Sun and the fifth largest. Earth is the only planet whose English name does not derive from Greek/Roman mythology. The name derives from Old English and Germanic.

Earth - Educational facts and history of the planet Earth.

Light travels fast. In one second it races around the Earth seven times. Then in a blink of an eye, light reaches the Moon. Going out to the stars, Astronomers know that by studying Cepheid variables, the fluctuation in brightness of certain stars, we can calculate the star's distance from Earth.

Big History Project: Our Solar System & Earth

Of main interests to us is the use of mining as a part of in-situ resource utilization, that is: making it easier to industrialize and colonize space by removing the need to pay the sky-high delta-V cost of lugging raw materials up Terra's gravity well.. But in the early stages, asteroid mining start-ups cannot be established to provide minerals to space industrialization because there won't ...
