List of Examples. 4.1. A capture filter for telnet that captures traffic to and from a particular host  
4.2. Capturing all telnet traffic not from 10.0.0.5

**Wireshark User's Guide**

The Windows .exe installers now ship with Npcap instead of WinPcap. Conversation timestamps are supported for UDP/UDP-Lite protocols. TShark now supports the -G elastic-mapping option which generates an ElasticSearch mapping file.. The "Capture Information" dialog has been added back ().The Ethernet and IEEE 802.11 dissectors no longer validate the frame check sequence (checksum) by default.

**Wireshark · News**

A reader recently asked for my opinion on building a server to be dedicated to network traffic capturing with Wireshark. While Wireshark is an excellent packet analysis application, its graphical interface is quite demanding on system resources (memory in particular) and is intended for use only in low-throughput environments or offline packet analysis (where packets are read from a file on disk).

**Long-Term Traffic Capture With Wireshark - PacketLife.net**

Popular research items include the web tutorials that cover using a number of open source security tools, the Top 100K WordPress Sites Analysis and the Hacker Tools of Mr Robot for a bit of fun.. Information Security is a fast changing field. The techniques of the attackers are constantly changing so it is necessary study attack methods and to adapt when necessary.

DNS works fine for all of the machines in our network. Except for a handful. These machines are on a .16 subnet. Only half of the machines on this subnet are able to fully resolve in DNS.

**[SOLVED] DNS not resolving on certain machines - Spiceworks**

No matter how tightly you restrict outbound access from your network, you probably allow DNS queries to at least one server. Adversaries can abuse this "hole" in your firewall to exfiltrate data and establish stealthy Command and Control (C2) channels that are very difficult to block. To understand the use of DNS for C2 tunneling, let's take a look at Ron Bowes's tool dnscat2, which ...

"The solutions and answers provided on Experts Exchange have been extremely helpful to me over the last few years. I wear a lot of hats - Developer, Database Administrator, Help Desk, etc., so I know a lot of things but not a lot about one thing.

**Recreate DNS for Active Directory Domain - Experts Exchange**

Describes an issue that blocks SMB file server share access to files and other resources through the DNS CNAME alias in some scenarios and successful in other scenarios. Provides a resolution.

**SMB file server share access is unsuccessful through DNS ...**

I have two dns servers configured, which are listed when viewing ipconfig /all. I would like to know which of the two servers I am using at the current time i.e. from my browser or via the tracert command. I believe that I will be using the first listed server unless it is unavailable at which point I will be using the next one.

**How to find which DNS server I am using (of the multiple ...**

In Wireshark 1.8 and later the default file format is Pcap-NG (aka NTAR). This format allows for more advanced features than the old libpcap (aka PCAP) format, such as multiple interface types and annotations.. If you need to load a PcapNG capture file into a tool that doesn't support the PcapNG format, then you first need to convert the capture file to the legacy PCAP format.

**Convert PcapNG to PCAP**

Detailed Improvements. The Nmap Changelog. describes more than 330 significant improvements since our last major release (6.00 in May 2012).. Here are the highlights: NSE Improvements. The Nmap Scripting Engine (NSE) is one of Nmap's most powerful and flexible features. It allows users to write (and share) simple Lua scripts to automate a wide variety of networking tasks.

We've recently migrated our Windows network to use DFS for shared files. DFS is working well, except for one annoying problem: users experience a significant delay when they try to access a DFS namespace that they have not accessed for some time.

**Long pause when accessing DFS namespace - Server Fault**

(1) Introduction. Check Point's FW Monitor is a powerful built-in tool for capturing network traffic at the packet level. The FW Monitor utility captures network packets at multiple capture points along the FireWall inspection chains. These captured packets can be inspected later using the WireShark (available for free from [www.wireshark.org](http://www.wireshark.org)). (2) Warnings
