What is an Ontology? This definition was originally proposed in 1992 and posted as shown below. See an updated definition of ontology (computer science) that accounts for the literature before and after that posting, with links to further readings.. Tom Gruber <gruber@ksl.stanford.edu>. Short answer: An ontology is a specification of a conceptualization.

### **What is an Ontology? - Stanford University**

A person, group or organization that has interest or concern in an organization.. Stakeholders can affect or be affected by the organization's actions, objectives and policies. Some examples of key stakeholders are creditors, directors, employees, government (and its agencies), owners (shareholders), suppliers, unions, and the community from which the business draws its resources.

I've always wondered what it would feel like to finally sit down and write this post. The one where I tell you that I'm hanging up my figurative (and literal!) hat with What I Wore.

### **What I Wore**

An organization or economic system where goods and services are exchanged for one another or for money.. Every business requires some form of investment and enough customers to whom its output can be sold on a consistent basis in order to make a profit.. Businesses can be privately owned, not-for-profit or state-owned. An example of a corporate business is PepsiCo, while a mom-and-pop catering ...

Celebrated annually on October 23 from 6:02 a.m. to 6:02 p.m., Mole Day commemorates Avogadro's Number ( $6.02 \times 10^{23}$ ), which is a basic measuring unit in chemistry. Mole Day was created as a way to foster interest in chemistry. Schools throughout the United States and around the world celebrate Mole Day with various activities related to chemistry and/or moles.
