Water Portal

We live in a time when demand for freshwater grows constantly, outstripping the planet's finite supplies and bringing the world closer to an increasingly severe global water deficit.

WATER MALAYSIA 2017 | A MWA Specialized International ...

A landfill site (also known as a tip, dump, rubbish dump, garbage dump or dumping ground and historically as a midden) is a site for the disposal of waste materials by burial. It is the oldest form of waste treatment (although the burial part is modern; historically, refuse was just left in piles or thrown into pits). Historically, landfills have been the most common method of organized waste ...

Landfill - Wikipedia

Water cooling is a method of heat removal from components and industrial equipment. Water may be a more efficient heat transfer fluid where air cooling is ineffective. In most occupied climates water offers the thermal conductivity advantages of a liquid with unusually high specific heat capacity and the option of evaporative cooling. Low cost often allows rejection as waste after a single use ...

Water cooling - Wikipedia

COD is a measure of total organic molecules dissolved in waste water, Where as The concept of BOD came after cities started dumping their waste water into the water bodies and this led to ...

What is the relationship between the COD and BOD values in ...
