What's the Difference Between Dementia and Alzheimer's ...

@hrishikeshp19, new String() is not of a string type, it's of an object type, so the === rule for objects applies. Usage of primitive strings, however, often results in coercing the strings into String objects, so the difference is subtle. If you were to assign new String() to two different objects, s1 and s2, the valueOf() method on each would return a string primitive for each, and s1 ...
