It means noting if heart stops beating for a second because it usually happens when we are sleeping because during sleep there is not great requirement of energy due to which heart beat rate slows down from 60-70 beats per minute to 30 beats per minute.

What does it mean if your heart stops for a second then ...

SCA is not the same as a heart attack. A heart attack occurs if blood flow to part of the heart muscle is blocked. During a heart attack, the heart usually doesn't suddenly stop beating. SCA, however, may happen after or during recovery from a heart attack. People who have heart disease are at higher risk for SCA.
