I like this listing of basic ways to visualize changes over time very much! There might be some additional information that could be interesting – I’ve held a lecture on the visualization of time-oriented data for a couple of years now and collected quite a wide variety of applicable techniques along with some theory.

Kevin Simler uses interactive simulations to explain how things — ideas, disease, memes — spread through a network. It always looks like concentrated chaos to begin, but then the things infect quickly. Adjust variables, press play, and watch them go.

## FlowingData

A histogram is based on a collection of data about a numeric variable. Our first step is to gather some values for that variable. The initial dataset we will consider consists of fuel consumption (in miles per gallon) from a sample of car models available in 1974 (yes, rather out of date).

R packages are the fuel that drive the growth and popularity of R. R packages are bundles of code, data, documentation, and tests that are easy to share with others. Before you can use a package, you will first have to install it. Some packages, like the base package, are automatically installed when you install R. Other packages, like for example the ggplot2 package, won’t come with the ...

## A Very Short History Of Data Science - Forbes

Dans les années 1820, on commence à représenter des données statistiques sur une carte. En 1826, Charles Dupin dessine une carte choroplèthe de l’instruction populaire en France, en coloriant les départements français en fonction de l’intensité de la variable représentée. Cette représentation visuelle rencontre un rapide succès et est aussitôt reprise par André-Michel Guerry et ...
