Summary: It is time to create and optimize the golden image that we will use to deploy all our desktops. The primary purpose of this golden image is to run a basic test with the Login VSI benchmark tool, so I will optimize a Windows 10 VM to get the best performance (low latency) and user experience (low applications response times). Only some basic applications and MS office 2016 will be ...

My post on Configuring NTP on Windows 2012 gets many hits so it seems like it's a popular topic. While that post is still valid and correct, sometimes you prefer using GPO in a domain environment instead of w32tm.exe command. And since I couldn't find a good step-by-step guide out there, I decided to write my own.
