Wason Card Problem Solution

The Original Card Problem. The solution, to put it in philosophical terms, is (Social Psychology): The only way to falsify an "if X, then Y" statement ("if vowel, then even number") is by finding an instance of "X and not Y" ("vowel and odd number"). D and 4 are irrelevant, because these cards cannot combine a vowel and odd number.

Wason Card Puzzle Solution - Gakuranman

The Wason selection task (or four-card problem) is a logic puzzle devised by Peter Cathcart Wason in 1966. It is one of the most famous tasks in the study of deductive reasoning. An example of the puzzle is: You are shown a set of four cards placed on a table, each of which has a number on one side and a colored patch on the other side.
