Pushover: Frequently Asked Questions

Bash is a Unix shell and command language written by Brian Fox for the GNU Project as a free software replacement for the Bourne shell. First released in 1989, it has been distributed widely as the default login shell for most Linux distributions and Apple's macOS (formerly OS X).A version is also available for Windows 10. It is also the default user shell in Solaris 11.

Bash (Unix shell) - Wikipedia

1. Commands This section provides information about user-level commands, such as ps and ls.. 2. UNIX System Calls This section gives information about the library calls that interface with the UNIX operating system, such as open for opening a file, and exec for executing a program file. These are often accessed by C programmers. 3. Libraries This section contains the library routines that come ...
