Windows Xp Screen Resolution Keyboard

So I've managed to mess up the resolution somehow when I accidentally hit a lot of the keys down. Because the resolution is so slow I can only see a small fraction of the screen and cannot click anything so I have to fix it via keboard. I tried windows button and Pand selected duplicate (by luck i could click it) but this is only a temp solution as it reverts back when I turn the computer off.

How to change screen resolution via keyboard ... - Yahoo ...

You can use a commandline tool like QRes.exe and create a shortcut to it that passes the resolution you want. So one shortcut per resolution. Place QRes.exe wherever you like, and place the shortcut on the desktop, then edit the shortcut to include the resolution. It will look something like this:

windows xp - Shortcut to set screen resolution - Super User

Add a keyboard shortcut by clicking the Change button over the resolution. Press the keyboard shortcut you want to press to switch to that resolution; we entered Ctrl+Alt+1 for our default resolution. Make sure not to use a keyboard shortcut you use in another application, as this will override it.
