Vector. A vector is formally defined as an element of a vector space.In the commonly encountered vector space (i.e., Euclidean n-space), a vector is given by coordinates and can be specified as .Vectors are sometimes referred to by the number of coordinates they have, so a 2-dimensional vector is often called a two-vector, an -dimensional vector is often called an n-vector, and so on.

Calculus. In general, "a" calculus is an abstract theory developed in a purely formal way. "The" calculus, more properly called analysis (or real analysis or, in older literature, infinitesimal analysis), is the branch of mathematics studying the rate of change of quantities (which can be interpreted as slopes of curves) and the length, area, and volume of objects.

Josiah Willard Gibbs (February 11, 1839 – April 28, 1903) was an American scientist who made significant theoretical contributions to physics, chemistry, and mathematics. His work on the applications of thermodynamics was instrumental in transforming physical chemistry into a rigorous inductive science. Together with James Clerk Maxwell and Ludwig Boltzmann, he created statistical mechanics ...

In , w_0 (τ_1) is the time response of the system to a unit impulse applied at time 0 and w_2 (τ_1) is the time response of the system to an impulse of twice unit magnitude at time 0.These response functions represent the memory of the system. If the system is linear, then $w_2 = 2w_0$ and $h_1 = w_0$, which is why the first-order kernel is referred to as the linear unit impulse response.
